RESOLUTION SUPPORTING THE CREATION OF iZONE
RESOLUTION 10
December 8, 2014

Submitted by: Sofia Salen, Senator At-Large

WHEREAS, Students' Association members find collaborative and experiential learning beneficial as it fosters a highly enjoyable environment that facilitates personal development and life skills; and

WHEREAS, there is currently no central location to catalyze and oversee resources for innovative and imaginative students; and

WHEREAS, collaborative work spaces fill up quickly in Gleason Library, Rettner Hall, and Residence Halls; and

WHEREAS, the creation of the iZone would facilitate working environments that focus on fostering innovation, experiential learning, and entrepreneurial efforts; and

WHEREAS, the iZone would be beneficial to Students' Association members as the current allocation of resources may not be conducive to the needs of a 21st century student.

NOW, THEREFORE BE IT RESOLVED THAT: The Students' Association Senate gives its support to the creation of the iZone, a hub of innovation that would offer centralized and focused support, a space for learning new skills, and a place for collaborative learning to ultimately enhance and support experiential learning and idea development through state-of-the-art interactive technology.

NOW, THEREFORE BE IT FURTHER RESOLVED THAT: The Students' Association Senate encourages Dean Mavrinac and other administrators to seek the input of the River Campus Libraries Student Forum for the planning and implementation phases of iZone.

Eudora Erickson
Speaker, Students' Association Senate

Antoinette Ese
President, Students' Association
